

Highest of all in Leavening Power.—Latest U.S. Gov't Report

**ABSOLUTELY PURE**

me as we have loved since, although we had counted ourselves a perfectly happy family.

Even with baptisms of the Spirit, Dr. Chapman said, God would send me of us right back to our everyday tasks to bear witness. The preacher wound up his sermon by saying Wyanemacker began his Christian work by laying a new brick walk at his home. "The church," he said, "is the church did not have funds to pay for the work."

**Bill Hardin's Fight With the Indians.**

The Hardinsburg correspondent of the Cloverport News recounts this tale of a man who has been called "Jo" in a conversation about the old Indian trail that stood below town away back in 1790, and which was later named Bill Hardin's bravery which has an unusual side to it. Hardin, in com-

hold of it and knead it in fine powder sugar, rolling it to the rollers, where it is rolled between steel rollers until it is of the proper thickness, when it is shaped into "saucers." The markers are steel knived roller which leave their impress on the wafer, so that before they come to the "seasoning room," after it is broken on the lines left by their rollers, the gum finds its way to the wrapping room, where the figures of 150 daily maidens are being played. Under these hard wafer cakes, raser, sun foil and overly rare develop the gum quick as a wink, and in another moment the "pecked" wafers are ready for the market, wherever it is shipped for sale to the general public.

Kentucky Y. M. C. A. Convention.

A marked characteristic of the pres-

Stephenson. While on the way, they were surprised by four or five Indians and captured. Hardin was a very brave and experienced hunter and a fighter against the Indians. He was fighting against them since the Indians. Although in this instance he was over a close watch for some means to get the better of the red men. He and his men were very brave and fought with them some kind of him from the woods. The Indians took them to carry them across the river. While the Indians were constructing a raft to work one of his lands lost so he

companion, Harshfield, however, to be cautious on the lookout, and on the way to the river he was told to be alert and that he (Harshfield) must fight. Harshfield was a Dutchman. It was but a little while when Harsh saw his chance and he sprang forward from the within, be, quick as thought, let fly and knocked one of the Indians into the river. Seizing a gun the next moment he fired and succeeded in putting them all to flight. Looking about for his friend, Harshfield, to his surprise he saw him some distance away, and he called out to him. Harshfield then made his way back to the fort.

Hardfella struggled in. The story is so true that it was all they could do to the fort for some time to keep the soldiers from killing that Dutchman for running."

**THE DEADLY CONSUMPTION CAN BE CURED.**

Y. A. Slocum, M. C., the Great Chemist and Inventor of the World, Free, the Editor of His Newly Discovered Remedies to Sufferers.

**EDITOR OF THE HARTFORD HERALD:**—I have discovered a reliable cure for Consumption and all Branches of the Lung Disease, and General Decline, Loss of Flesh and all Consumptions, and I have but little more to say.

"British industrial existence seems fast becoming one huge poison swamp of reeking pestilence—physical and moral hideous living hell—where the souls and bodies burn alive. Thirty thousand untold souls—needlewomen working themselves away to death. Three million paupers rotting in forced labor and debt are but little more than the ledger of despair."—[Thomas Carlyle.

care. So prophoetic am I of its power to cure that to make its merits known, I will send you, as my additional gift, three bottles of my Newly Discovered Remedy upon receipt of this advertisement.

Address,  
J. C. BLOOM, M. D.,  
5114 G. W.  
of Pine Street, New York.

The Salesman.

[Household Lady.]  
"Let me see some of your black kid gloves," said a lady to a clerk.  
"These are not the latest style, are they?" she asked, when the gloves were produced.  
"Yes, madam," replied the clerk, "we have had them in stock only two weeks."

**ELY'S CREAM BALM**  
Is quickly Absorbed,  
Cleanses the  
Skin, Relieves  
Itchy Pains and  
Inflammation,  
Protects the  
Membrane from Cold,  
Restores the  
Softness of the  
Skin, Gives Re-  
freshment of  
Mind and  
Will cure  
**COLD IN THE HEAD**  
A particle is applied directly to the  
nose, and the mucus, if any, is  
sucked up, and the  
passage is cleared.  
W. Warren Street, New York.

**W. WARREN STREET, NEW YORK.**

"I didn't think they were," because the brown papers were black hide have tan stitches, and vice versa. I use the tan stitches, but not the vice versa."

The clerk explained that vice versa was French for seven buttons, so she bought three pairs.

**Basis of Chewing Gum.**

Four million pounds of gum chicle, the product of the Mexican sapota tree, entered the United States during 1950. This entire product, valued at nearly \$1,500,000, became the basis of chewing gum.

gun factory is interesting. Here over 1,000,000,000 pieces of gun are annually produced and shipped to every portion of the world. Three hundred employees are engaged in the manufacture of the gun, the first step of which is the porting of the new design, which is gathered by the peons in Mexico and exported in bales, containing about 150 pounds each. The gun is taken from the bales and chopped into small pieces. These are freed of tree bark and chips by steaming and picking, then ground in mills making 2,400 revolutions per minute. The ground gun is subjected to a continu-

From here the gum is sent to the "white-aproned cook," who adds the purest sugar and the freshest cream, granulated pepsin, powdered gum or kola, or other desired ingredients to it, and cooks in a steam-jacketed cauldron, where it is turned and mixed by an ingenious double-acting heater or rotative table until it has become a consistent, bubble-free dough. Now the "dough boys" take

which is gathered by the peons in Mexico and exported in bales, containing about 150 pounds each. The gum is taken from the bales and chopped into small pieces. These are freed of tree bark and chips by sieving and picking. The ground gum is packed 2,400 rebarbals a minute. The ground gum is subjected to a continuous heat of 140 degrees Fahrenheit in drying rooms.

From here the gum is sent to the "white-sproned cook," who adds the purest sugar and the freshest cream, granulated pepsi, powdered gum or kola, or other desired ingredients to it, and cooks in a steam-jacketed cauldron, when it is turned out, mixed by an ingenious double-rolling heater or rotating paddle until it has become a thick, sticky mass.

Now the "dandy boys" take
